

# Valeriy Anysenko

valeriy.anysenko@gmail.com | vlrsnk.com | github.com/vlrsnk

## Skills

---

**Front-end:** HTML5, CSS3, SASS, Bootstrap, Tailwind CSS, JavaScript (ES6+), TypeScript, React, Redux, Twig

**Back-end:** Java, Spring Boot, Node.js, Express.js, PHP, Slim Framework, PostgreSQL, SQLite, Memcached

**Tools:** Git, AWS (EC2, S3, RDS), GCP, Nginx, Linux, Bash, REST APIs, Postman, JUnit, Jest, Jira

## Experience

---

**Full Stack Software Developer**, Revature – Virginia Beach, VA, US

Oct 2024 – Mar 2025

- Built a responsive React front end (TypeScript, Tailwind CSS) for an employee reimbursement system, enabling dynamic user interactions, secure session-based authentication, and seamless cross-device compatibility
- Developed a Spring Boot backend with RESTful APIs, PostgreSQL, and role-based access control, handling CRUD operations, data persistence with JPA, and robust error handling to ensure system stability and security
- Deployed the application on AWS S3, RDS, and EC2, ensuring scalability and reliability through JUnit testing

**Technical Support Agent**, Liberty Tax Service – Virginia Beach, VA, US

Nov 2024 – Feb 2025

- Assisted Liberty Tax Service franchisees in a fast-paced environment by troubleshooting tax preparation software, diagnosing software and hardware issues, and ensuring smooth and efficient tax filing processes
- Provided clear solutions to technical challenges, collaborated with teammates, and maintained effective communication with customers, utilizing advanced IT tools to enhance satisfaction and resolve issues efficiently

**Search Engine Optimization Specialist**, Self-employed Contractor – Chernihiv, Ukraine

Jan 2014 – May 2024

- Engineered a CMS with Slim Framework and SQLite, achieving page load times under 1 second under heavy load
- Integrated Memcached, cutting server load by 47% and handling 10 million daily requests efficiently
- Developed MySQL-PHP tools, doubling indexation speed and improving search rankings by 5 positions
- Increased organic traffic 7x by identifying high-volume, low-competition keywords and optimizing content
- Automated the gathering of dropped domain parameters, cutting processing time by 33% and enhancing efficiency
- Implemented automatic index submissions using Google, Bing, and Yandex APIs, tripling website indexation

## Projects

---

**ReimburseMate**

reimbursemate.netlify.app

- Built a responsive React front end using TypeScript and Tailwind CSS, delivering modern and dynamic user interactions
- Developed a Spring Boot backend with RESTful APIs, PostgreSQL, and role-based access control, deployed on AWS EC2
- Implemented Hibernate ORM and tested service layers using JUnit, ensuring a reliable, scalable system backed by RDS

**Personal Portfolio Website**

vlrsnk.com

- Created a fully responsive personal portfolio website to showcase Full Stack development projects, utilizing HTML5, CSS3, JavaScript (ES6+), and Gulp for efficient build processes, deployed on a private VPS with a custom domain name
- Integrated modern web development practices, using Stylelint and optimized production builds for deployment

## Education

---

**National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute"** (Kyiv, Ukraine)

Jan 2014

BS in Computer Science

## Certifications

---

**AWS Certified Cloud Practitioner**, (AWS)

Nov 2024

**Front-End Engineer**, (Codecademy)

Dec 2024
